PROFESSIONAL SUMMARY

Final-year cybersecurity student (Computer Science and Engineering, Cyber Security) at Park College of Engineering and Technology, with practical exposure to vulnerability assessment, penetration testing fundamentals, and web application security across 2 cybersecurity internships, 3 hands-on projects, and structured ethical hacking training. Designed and deployed a network security honeypot to capture and analyze unauthorized access attempts, applying Wireshark for traffic inspection and Nmap for network reconnaissance, alongside OWASP Top 10 concepts and Burp Suite. Comfortable working across Linux and Windows environments, using Python and Bash for scripting and analysis tasks. Holds 4 certifications and training credentials, including ISC2 Certified in Cybersecurity.

TECHNICAL SKILLS

Vulnerability & Penetration Testing: Vulnerability Assessment, Penetration Testing Fundamentals, OWASP Top 10, Network Reconnaissance, Unauthorized Access Detection

Web Application Security: OWASP Top 10, Burp Suite, URL/Web Content Analysis

Security Tools: Wireshark, Nmap, Burp Suite, Splunk, Autopsy, FTK Imager

Networking & Operating Systems: Windows, Linux, Networking Fundamentals

Programming & Scripting: Python, Bash Scripting, Regular Expressions

Web Technologies: HTML, CSS, JavaScript

Version Control / Automation: Git, GitHub

INTERNSHIP EXPERIENCE

Ethical Hacking Intern | iStudio
Pune, Maharashtra

- Qualified for the internship via the Internship Common Aptitude Test (iCAT) and completed structured hands-on training in core ethical hacking techniques, including vulnerability identification and penetration testing fundamentals.

Cyber Security Intern | Codec Technologies
Hybrid, India

- Completed project-based cybersecurity assignments and training modules under a project head, working remotely through the organization's internship platform.

PROJECTS

Network Security Honeypot Lab

- Designed and deployed a honeypot to detect and monitor unauthorized network access attempts.
- Analyzed captured attack patterns and reconnaissance activity using Wireshark to identify common intrusion techniques and network-level weaknesses.
- Documented findings to build practical understanding of network-based attack vectors relevant to penetration testing and vulnerability assessment work.

Campus Shield

- Built a web-based platform with URL analysis and risk-scoring logic to evaluate internship and course websites for scam indicators.
- Applied basic web-security assessment thinking to flag suspicious or high-risk URLs before students engaged with them.

Fact Checker Browser Extension

- Built a browser extension (HTML, CSS, JavaScript) that analyzes web content and verifies sources to flag misleading or unreliable information.
- Applied basic content-verification logic as a lightweight approach to assessing the credibility of unverified web sources.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering (Cyber Security) — Expected 2027
Park College of Engineering and Technology, Coimbatore, Tamil Nadu
CGPA: 8.11 (up to 6th sem)

CERTIFICATIONS & TRAINING

- Certified in Cybersecurity (CC) — ISC2
- Cyber Security – Practical Training — Adaovi
- Cisco LABS Crash Course — EC-Council
- FCF – Getting Started in Cybersecurity 2.0 — Fortinet Training Institute

LANGUAGES

Tamil, English
